

ANDREY MAULANA

Senior Backend Engineer | Laravel Expert | System Architect

sir.andreym@gmail.com • +62 895 3410 3101 2 • Bogor, West Java, Indonesia • [linkedin.com/in/sir-andrey](#) • [github.com/sir-andrey](#)

PROFESSIONAL SUMMARY

Senior Backend Engineer with 7+ years of experience specializing in event management systems and high-scale web applications. Architected the Kelolain platform serving 100K+ users across 50+ production systems. Expert in the Laravel/PHP ecosystem with a proven track record delivering solutions for Fortune 500 clients including BCA, Mandiri, and the ASEAN Summit. Strong focus on modular architecture, database design, and system scalability.

KEY ACHIEVEMENTS

- ✓ Architected Kelolain — modular event management platform with fully reusable components
- ✓ Delivered 50+ production systems for banking, government, and corporate clients (BCA, Mandiri, ASEAN Summit)
- ✓ Handled 10,000+ concurrent users with <200ms response time
- ✓ Designed generic database architecture reducing development time by 60%
- ✓ Led technical decisions for 6 projects and maintained 99.9% uptime across all production systems

CORE TECHNICAL SKILLS

Languages	PHP 8.x (Expert), Ruby, Java, JavaScript, Go (Learning)
Frameworks	Laravel 8–12 (Expert), Ruby on Rails, Spring Boot
Databases	MySQL (Advanced), PostgreSQL, Redis
API & Tools	REST API Design, Swagger, JWT Auth, Firebase
DevOps	Docker, Nginx, Git, AWS S3, Laravel Horizon
Specializations	Event Management Systems, Database Design, Queue Systems, Real-time Features, High-traffic Applications

WORK EXPERIENCE

Senior Back-end Engineer

[PT. Uniktif Media Indonesia](#)

2022 – Present | Bogor, Indonesia

- Architected Kelolain platform — comprehensive event management system with modular, reusable components (Digital Stamps, Seating Arrangement, Raffles, Custom Registration)
- Delivered 50+ event management systems for Fortune 500 clients (BCA, Mandiri) and government projects (ASEAN Summit) serving 100K+ total users
- Designed generic database architecture using polymorphic relationships, reducing development time by 60%
- Led technical decisions for 6 projects and mentored junior developers
- Coordinated server scaling for 10,000+ concurrent users with <200ms response time and 99.9% uptime
- Implemented comprehensive logging ensuring 100% issue traceability for critical systems

Tech Stack: Laravel 8–12, PHP 8.0–8.3, MySQL, PostgreSQL, Firebase, Redis, Laravel Horizon, JWT Auth, Spatie Permissions, Swagger, Docker, Nginx, AWS S3

Back-end Developer

[CV. Nine Operation Development](#)

2020 – 2022

- Developed e-commerce platform using Ruby on Rails with full backend functionality including product management, shopping cart, and order processing
- Integrated payment gateways (Midtrans, Xendit) and shipping APIs for seamless transaction processing
- Optimized database performance through normalization and query optimization, improving page load times by 40%
- Implemented queue systems for email notifications and async processing using Sidekiq

Tech Stack: Ruby on Rails, PostgreSQL, REST API, Sidekiq, Redis

IT Staff

[PT. Module Intracs Yasatama](#)

2019 – 2020

- Built monitoring applications for SAP and Mobile Topup systems ensuring system health and performance tracking
- Developed REST APIs for Mobile Topup services using Java Spring Boot with comprehensive API documentation
- Maintained and troubleshooted internal systems ensuring high availability and quick incident resolution

Tech Stack: Java Spring Boot, REST API, MySQL

Data Entry Intern

[PT. Sangkuriang Internasional](#)

2018

- Managed data entry for web-based systems with high accuracy
- Created documentation reports for website operations

SIGNATURE PROJECT: KELOLAIN PLATFORM

Comprehensive event management platform with modular, reusable components. Polymorphic relationships and flexible JSON fields allow any module to fit ANY event type with zero schema changes — achieving 60% reduction in development time across 20+ production events and 100K+ users. Key modules: Digital Stamps, Automated Seating (500+ VIP guests), Custom Registration, QR Check-in, Real-time Raffle.

Tech: Laravel 10, PHP 8.1, MySQL 8.0, Laravel Horizon, Redis, JWT Auth, Swagger, AWS S3, Docker, Nginx

FEATURED PROJECTS

Mandiri Investment Forum — 2024–2025 | Banking

10,000+ concurrent users, server scaling for live-streaming, <200ms response, 99.9% uptime. | [Laravel 10](#), [MySQL](#), [Redis](#), [Docker](#)

BCA Wealth Summit (WELMA) — 2022–2025 | Banking

4 consecutive years — registration, QR check-in, raffle, games. Comprehensive logging for 100% issue traceability. | [Laravel 10](#), [MySQL](#), [Redis](#), [Laravel Horizon](#)

BCA Mega Quiz Banker Challenge — 2023–2025 | Banking

Real-time quiz, 3 years. Firebase sync across 1000+ participants with remote game flow control. | [Laravel 10](#), [MySQL](#), [Firebase](#), [WebSocket](#)

ASEAN 2023 Summit — 2023 | Government

Registration, QR check-in, state guest recording, real-time analytics — 1000+ concurrent users. | [Laravel 10](#), [MySQL](#), [Redis](#)

ITS Asia Pacific Forum — 2024 | Corporate

Registration, ticketing, business matching — 4000+ concurrent users, <200ms response. | [Laravel 10](#), [MySQL](#), [Redis](#)

TECHNICAL EXPERTISE

API Development	RESTful design, Swagger (L5-Swagger), JWT Auth, versioning, rate limiting — 50+ APIs, 100K+ users
Database & Performance	Normalization, polymorphic relations, query optimization, JSON fields — <200ms on 10K+ concurrent
System Architecture	Modular monolith, Laravel Horizon queues, Firebase/WebSocket real-time, Redis caching
Code Quality & Leadership	Clean code, code reviews, junior mentoring, Git workflow, OpenAPI documentation, detailed logging
